

BPM@SharePoint

How about using just one system to model and intelligently link operational processes, relevant documents and organizational structure, while complying with internal and external rules and regulations, - and all this at a low maintenance effort?

How about optimizing processes and keeping records of changes? How about managing and providing knowledge about your company via intranet?

Microsoft Visio® fully integrated into **QUAM 2.0** based on Microsoft® SharePoint is your BPM-solution!

QUAM as a Business Process Management Solution will empower you to focus on your core competencies and strategic execution.

The integrated System QUAM

Operational Structure and Process Flows

QUAM 2.0 - As Dynamic as your Business!

SIMPLICITY — TRANSPARENCY — CONNECTIVITY — SCALABILITY

Multilingual SharePoint®

QUAM is a process-oriented Business Management Solution capable of handling multiple languages, easy to use and is executable worldwide.

It is simple and intuitive to use for all employees at all levels of the organization. Core Processes can be modeled in English and per push of a mouse button be replicated and translated into as many languages as Microsoft® SharePoint provides.

Benefits:

- Centralized coordination and homogenous business operation and execution
- Continuous improvement planning captured worldwide
- Higher transparency – clear allocation of roles and responsibilities
- Cost lowering through increased effectiveness and coordination
